CAULIFLOWER

This seed was grown in Denmark by the same specialist who has been furnishing us with cauliflower seed for many years. We believe we have enough of this seed to last through this season.

Early Snowball (Special CC-730)—We have reason to believe from the reports brought to us by cauliflower growers who use this seed year after year that it is far above the average Early Snowball seed offered. It matures early and evenly. The pure white heads are remarkable for their great depth and unexcelled white color and do not become "soft" or "ricy" and you will not find any with green leaves in them. ¼ oz., \$1.20; oz., \$4.00; ¼ lb., \$14.00; lb., \$50.00.

Improved Super Snowball—A variety making a very large, deep, solid, snow white head. The heavy upright growing leaves are very numerous and being close together force the small inner leaves to curl over and protect the head. ¼ oz., \$1.20; oz., \$4.00; ¼ lb., \$14.00; lb., \$50.00.

Snowdrift—A few days later than Snowball. Large, solid deep headed. Several cauliflower growers have told us it is the best they have ever raised. ¼ oz., \$1.20; oz., \$4.00; ¼ lb., \$14.00; lb., \$50.00.

CELERY

Cornell No. 19—Developed and introduced by College of Agriculture at Ithaca. A cross between Utah and Golden Self Blanching. Early, 25 in. tall. Highly resistant to fusarium yellows. Oz., \$1.45; ¼ lb., \$5.50; lb., \$20.00.

Hart & Vick's Golden Plume (Wonderful)—This is the best early yellow celery and our Special Strain as fine as any in the country. The stalks are large, thick and solid, and the edible portion unusually long. The plants are compact, full-hearted and blanch readily. We are very proud of this Special Strain of Golden Plume. We know it will please the most critical celery grower. Oz., 65c; ¼ lb., \$2.25; lb., \$8.00.

Supreme Golden—New tall Golden Self Blanching later than Golden Plume and a little taller. Long jointed broad thick stems, and a very good heart. ¼ oz., 30c; oz., 90c; ¼ lb., \$3.25; lb., \$12.00.

Golden Self-Blanching. The Old Dwarf Growing, Long Keeping Kind—The stalks are thick and solid and the stocky plants have large, solid hearts. Celery growers have found our strain of this kind very good. Oz., 65c; ¼ lb., \$2.25; lb., \$8.00.

Irondequoit—New early green celery with broad, thick round stems 10 in. to the first joint. Full hearts. Fine quality. Blanches easily to cream white. Oz., \$1.45; ¼ lb., \$5.50; lb., \$20.00.

Tendergreen—A better celery than Utah. Midseason kind that grows about 27 in. high. Heavy round stems 10 in. long. Very good heart. Blanches very easily. Quality very good. Oz., \$1.45; ¼ lb., \$5.50; lb., \$20.00.

Utah or Salt Lake—A splendid green celery. Sturdy, compact plants, exceptionally solid with broad, thick, rounded stems, crisp and of very high quality. Oz., 65c; ¼ lb., \$2.25; lb., \$8.00.
